

BANDGUARDTM
Supporting You Best

Elastic Cotton Crepe Bandage

Bandguard™ is the gold standard when it comes to elastic cotton crepe bandages. In accordance to CE & ISO standards, Bandguard™ Elastic Cotton Crepe Bandage is manufactured with the highest grade of cotton to provide maximum comfort and postoperative support.

The Bandguard™ soft-touch elastic technology has fibers that are closely knitted in a multi-weave pattern providing maximum stretch without reducing compression per square centimeter, thus ensuring essential conformity and support when required. Engineered to be used as a gentle support and compression bandage which helps to reduce pain and maintain stability in sprains and strains. It can be used for the fixation of splints, wound care and medical devices. Highly recommended for post-orthopaedic and general surgery. It can be used for mild to heavy retention.

Elastic Cotton Conforming Bandage

The superior class in lightweight conforming bandages that enables it to be applied with ease on body contours. Bandguard™ Elastic Cotton Conforming Bandages can be used to hold other devices in place, such as dressings, synthetic casts, black slabs and IV lines.

This product is suitable for active patients with high movement areas such as joints . The cool and lightweight material with multi-weave technology permits air circulation, allowing us to achieve a 4 meter stretch whilst retaining its shape and effective functioning use. Manufactured from the highest grade cotton and elastic, Bandguard™ offers comfort and overall better patient outcomes.
